

ENGINE ASSEMBLY LUBE

Lubricante Ensamble de Motor

Suitable for all gasoline, diesel, and LPG engine builds. Use for engine pre-assembly lubrication. Safeguards the engine and parts during the first start. Features a high-performance anti-oxidant, anti-friction, and anti-wear formula.

BENEFITS:

- ✔ Protects the engine and components during initial startup.
- ✔ Prevents friction and extreme wear on critical parts.
- ✔ Eases component assembly.
- ✔ Optimizes smooth engine break-in and prevents corrosion.

FEATURES:

- Optimal for diesel, gasoline, or LPG engine assembly.
- Compatible with all mineral, 100% synthetic, and semi-synthetic oils.
- Free of ash-forming ingredients and heavy metals.

MADE IN
GERMANY

APPLICATION NODES

Apply this product to engine components during assembly, such as the camshaft, connecting rods, crankshaft, pistons, cylinders, etc.
