

STOPS OIL LEAKS

ENGINE OIL STOP LEAK

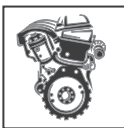

The combination of highly efficient and innovative components regenerates plastic and rubber seals in the oil circuit and keeps it soft. The oil loss through seals or piston rings is reduced or stopped, which reduces the oil consumption. In addition, abrasion and wear will be significantly reduced, the viscosity of the oil is kept stable and works against the oxidation of the engine oil. The usable lifetime of the engine will be extended.

BENEFITS:

- ✔ Effectively seals engine oil leaks caused by dried-out seals or gaskets.
- ✔ Regenerates plastic or rubber seals and gaskets.
- ✔ Excellent protection against oil oxidation.

APPLICATION AREA	CONSUMPTION	TREATMENT TIME
For use in all 4-stroke and diesel engines, transmissions, differentials, etc. This product is compatible with all commercially available oils.	10.1 oz sufficient for 5 liters of oil. Mixing ratio:	While engine is running.

APPLICATION NODES
 Add to oil system. We recommend an oil system cleaning with Oil System Cleaner before using this product. Total Oil capacity according to manufacturer specifications must be observed.

Content: 10.1 fl.oz
 Units per case: 24 pieces
 Art.No. 33183BC
