

DIESEL POWER

CETANE BOOSTER

HIGH-POWER MAXIMIZER FOR DIESEL ENGINES.

Cetane Booster increases the cetane number of the diesel fuel by up to 5 points. The product is the best for diesel fuel of lower quality. It reduces the "engine knocking", produces an even and powerful combustion, reduces soot and prevents overheating that is due to the low cetane number on the diesel fuel.

BENEFITS:

- ✓ Boosts engine power.
- ✓ Raises cetane levels by up to 5 points, depending on fuel quality.
- ✓ Reduces diesel knocking and overheating caused by low cetane levels.
- ✓ Improves cold starts and optimizes the combustion process.

APPLICATION AREA	CONSUMPTION	TREATMENT TIME
For use in diesel powered engines. Recommended for engines with particle filters, turbo and catalytic converters.	10.1oz sufficient for 80 liters of diesel. Mixing ratio: 1:200	While engine is running.

APPLICATION NODES

Fill directly into the diesel tank. Observe mixing ratio.

Content: 10.1 fl.oz

Units per case: 24 pieces

Art.No. 33216BC
