TRIPLE X PLUS

HIGH-PERFORMANCE CLEANER FOR THE AIR INTAKE SYSTEM, VALVE SEAT CARBON DEPOSITS, AND COMBUSTION CHAMBER.

Triple X plus is the latest generation of our specially designed products for the air intake system. Developed for use in both fuel injection systems and engines with exhaust gas recirculation or "EGR". Triple X plus thoroughly cleans the entire system starting from the air intake all the way through the exhaust for all petrol and diesel engines. This product may only be used with the Injection & Exhaust System Cleaning Device Clear Flow, art.-no.: 34011. Even heavy deposits can now be removed residue-free without affecting sensitive materials or components. Triple X plus successfully cleans and lubricates the entire air intake system during application. The engine runs more powerful and smooth. The fuel consumption and exhaust emissions will also be significantly reduced.

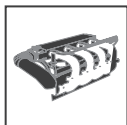

BENEFITS:

- ✓ Cleans and lubricates the air intake system, especially the intake valve seats.
- ✓ Effectively dissolves and removes even the toughest deposits.
- ✓ Greatly optimizes fuel consumption and exhaust emissions.
- ✓ Ideal for direct-injection vehicles.

APPLICATION AREA	CONSUMPTION	TREATMENT TIME
Cleaning of the complete air intake system and entire combustion chamber of petrol and diesel engines.	12.7 oz per application.	During application.

APPLICATION NODES

Professional use only: applied solely using air intake cleaning device! Triple X plus can be used on all engines equipped with oxygen sensors, catalytic converters or fuel injection. Note: When in use, instructions for the Clear Flow device, art.-no.: 34011 must be observed.

Content: 12.7 fl.oz

Units per case: 28 pieces

Art.No. 33648bc
