

# RADIATOR CONDITIONER

Acondicionador para Radiador

HIGH-PERFORMANCE PROTECTION FOR RADIATOR SYSTEMS.

Radiator Conditioner protects against rust, corrosion and lime scale. It lubricates valves, thermostats and the water pump. It improves the heat exchange and keeps the coolant's pH value stable. Radiator conditioner is compatible with all antifreeze brands.

### BENEFITS:

- ✓ Prevents electrolysis, cavitation, and stabilizes pH levels.
- ✓ Works perfectly with water.
- ✓ Lubricates the pump, thermostat, gaskets, and seals.
- ✓ Prevents rust and corrosion formation.

APPLICATION AREA	CONSUMPTION	TREATMENT TIME
For use in all water-cooled engines.	10.1oz sufficient to treat cooling systems of 4 – 8 liters capacity.	Works during operation.

### APPLICATION NODES

Add to cooling system regularly at every advised service interval. For best results, we recommend flushing the cooling system with Radiator Flush beforehand.

 **MADE IN GERMANY**
